

SpeedShare 2.1 Installation Quick Instructions

Installing SpeedShare on an iPad:

1. Download and install the GoodReader app from the Apple App store on your iPad.
2. Click on **Connect to Servers**, then press **Add**. Then choose **FTP Server** in the next pop-up window.
3. In the next pop-up window, set **Readable Title = SpeedShare** and **URL-address = [ftp.agilent.com/SpeedShare](ftp://ftp.agilent.com/SpeedShare)**, Notice the two capital "S" letters in SpeedShare (case sensitive).

4. Now, click on the **SpeedShare** directory under the *Connect to Servers* section (as shown above). Then, to synchronize and add the folder to your iPad, **highlight the folders you want** and then press **Sync**. Then select **Download here & Synchronize** in the next pop-up window.
5. Finally, you are also asked to specify sync parameters before downloading. In this case, you want to tell GoodReader to use a **Download only** sync.
6. In the future, start a sync by pressing the sync button beside the sync entry in the Remote Sync tab: 
7. Set GoodReader to open external links by opening its settings (the star-looking button on the bottom, selecting "Viewing PDF files" and turning on the "For PDF internet links ... use Safari").

Installing SpeedShare on a PC:

1. Open Windows Explorer and type in <ftp://ftp.agilent.com/SpeedShare> (note the two capital "S" letters in the name)
2. Copy and paste the folders you want to your PC via a simple drag and drop
3. Periodically check the file date stamp to ensure you have the latest files on your PC
