

Industry Comparison: Agilent 2000 X-Series versus Rigol DS1000CA/B Oscilloscopes

Agilent's new 2000 X-Series oscilloscopes use breakthrough technology to deliver value, functionality, and flexibility at prices that fit into existing budgets. The 2000 X-Series offers an 8.5-inch WVGA high resolution display and our new industry-exclusive integrated function generator and logic analyzer. Agilent-designed *MegaZoom IV* Custom ASIC technology allows you to see more signal detail with update rates of over 50,000 waveforms per second.

InfiniiVision 2000 X-Series

- 50,000 waveforms per second
- 3 instruments in 1
- Fully upgradable

Agilent-designed *MegaZoom IV* custom ASIC technology powers the fastest waveform update rates, integrated MSO, integrated industry-exclusive WaveGen, and responsive deep memory

Of your signal, more of the time:

- The 8.5-inch WVGA display offers 2x the viewing area and 5x the resolution versus a 5.7-inch QVGA display
- > 50,000 waveforms per second update rate allows you to see infrequent events and subtle signal details that the DS1000A/B will miss
- Memory depth up to 100 kpts (> 6-10x the DS1000A/B) allows you to keep your sample rate high at longer time/division settings

8.5-inch WVGA display offers 2x the viewing area and 5x the resolution

> 6x the memory allows you to keep sample rates higher on longer time/div settings

With the power of 3 instruments in 1:

- **Best-in-class oscilloscope**
Provides features not normally found in this class of scope such as a large display, deep memory, and powerful triggering
- **Industry-exclusive WaveGen built-in function generator**
Ideal for educational or design labs where bench space and budget are limited
- **Logic timing analyzer (MSO)**
Ideal for R&D engineers on a tight budget who need more than the traditional 2 or 4 analog channels to troubleshoot today's digital designs

Investment protection with the industry's only fully-upgradable oscilloscope:

- Upgradable bandwidth
- Upgradable MSO
- Upgradable WaveGen
- Optional measurement applications

Buy only what you need today. Simple, after purchase upgrades protect your investment and allow you to enhance your equipment as your needs change.

Infrequent glitch and signal jitter captured after 2 seconds on 2000 X-Series with > 50,000 wfms/s

2000 X-Series' exclusive MSO adds eight integrated digital channels for extra triggering or logic analysis; DSO models are customer-upgradable to MSO models

DS1000B after 40 seconds—it never sees the glitches and shows limited signal jitter due to its significantly slower update rate

2000 X-Series' exclusive integrated 20-MHz function generator saves money and space
