

HP E1430A

Exchange Module Installation Note

HP E1430A Exchange Module Kit

Supersedes none

I. Description

Use this procedure to properly install the exchange HP E1430A VXI ADC Module.

II. Shipping List

This kit contains the following parts:

- This Installation Note
- E1430A Exchange Module
- 7121-5618 Calibration Label
- N/A Certificate of Calibration

Caution

Before installing the HP E1430A module into the VXI mainframe, be sure to set the mainframe power switch to standby (**O**) or remove power from the mainframe. Inserting or removing the module with power on can damage the module or mainframe.

Caution

To protect circuits from static discharge, remove or replace modules only at static-protected work stations.

III. Installation

Do the following when you replace the HP E1430A module.

Step 1. Write the faulty module's serial number on the exchange module's blank serial number tag using a fine point permanent marker.

Step 2. Write the faulty module's serial number on the exchange module's Certificate of Calibration.

Step 3. Remove all customer labels from the faulty module and place on the exchange module.

Step 4. Set the exchange module's logical address configuration switch to the faulty module's original logical address for customer configuration convenience.
