

Remote Connection to the PC

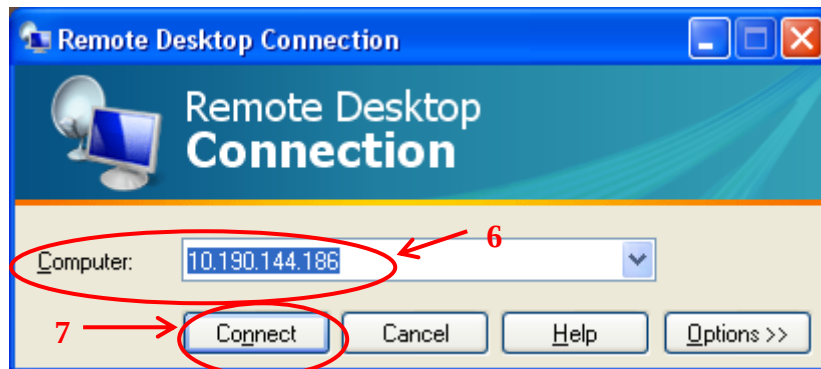

1. You will need to allow your PC to accept remote connections. Go into the *Control Panel* and click on the *System* (1) option.

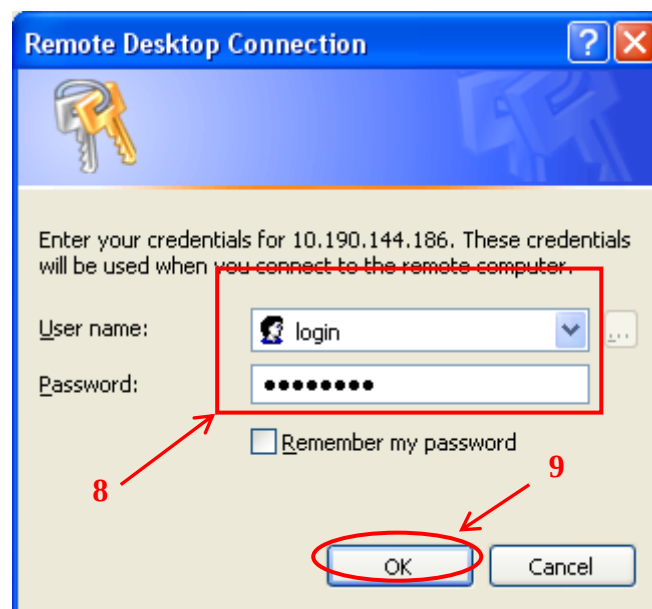

2. Then select the *Remote* (2) tab and once you open it you need to select both the *Remote Assistance* and the *Remote Desktop* (3) options.

3. Click the *Ok* (4) and then the *Apply* (5) buttons to enable this change.
4. To connect remotely select the *Start/Programs/Accessories/Communication/Remote Desktop Connection*.

5. If you are connecting to a computer not on the internal network, you will need to type in the IP address of the computer (6) you want and select *Connect* (7).
6. If you are connecting to a computer on the internal network, you do not need to know the IP address. You will need to type in the computer's name (6) and then select the *Connect* (7) button.
7. The following screen will appear where you will need to enter the login (8) and password for the computer you are connecting to. Once entered click the *OK* (9) button..

8. You are now connected to the remote desktop selected.
