
HP 4062UX System Administrator

Technical Data

Course Overview

The HP 4062UX System Administrator course teaches students how to define and administer an architecture for the HP 4062UX tester environment in Test Labs and Fabs using VUE, X windows, the HP-UX file system and system specific tools.

The emphasis of the course is to develop HP 4062UX System Administrator skills: resource utilization, crash recovery techniques, backups, updates, installation and post installation of related applications.

This course is applicable to HP s300 and s700 workstation.

Specifications

Course Length

2 days

Audience

Test Floors and Labs System Administrators and Advanced Users of IC-MS and HP 4062UX systems.

Productivity**

Classroom Training Benefits

Experienced HP Instructors

Learn from an experienced HP instructor who is an expert in using and applying instrument systems to meet your measurement needs.

Available at HP Classrooms or Your Site

Take advantage of HP's learning facilities, equipment, and interactive learning environment by attending class at an HP facility. Or, save travel expenses and time by organizing a dedicated class at your location.

Regularly Scheduled Classes

Plan training months in advance.

Extensive Hands-on Practice

HP classroom training is characterized by extensive hands-on experience and interactive class discussion. HP classroom training pays off immediately because it is geared to real-world solutions.

Comprehensive Student Materials

Copies of course materials are provided for future reference on the job.

HP 4062UX System Administrator (4062UX+24X)

Course Agenda

Day One

- HP-UX file system layout
- Boot sequence
- fsck
- Login sequence
- LAB
- VUE and X layout
- LAB
- SAM and HP-UX commands
- LAB
