

NEW THICK-FILM INFORMATION AVAILABLE FROM ANAREN, INC.

Free literature overviews thick-film manufacturing capabilities of company's Salem, NH-based Anaren Ceramics subsidiary, includes equipment list and design guide.

Syracuse, NY - Anaren, Inc. (NASDAQ: ANEN) announced today that it has developed an free informational kit developed to introduce design engineers, manufacturing engineers, and purchasing professionals to the company's thick film ceramic circuits capabilities. Anaren's thick film service -- in addition to a range of other ceramics solutions ranging from standard, high-volume resistive components to highly customized, complex LTCC modules -- is offered through the company's Anaren Ceramics subsidiary, located in Salem, New Hampshire.

Product Line Manager Bill Polinsky, at the Salem facility, indicated that the kit includes a design guide "including tips and guidelines for designing a thick-film circuit, equipment list, and top-level introduction to Anaren's capabilities" and information on the company's experience with thick-film across the defense, commercial wireless, and consumer electronics sectors.

The kit may be obtained by calling 603.898.2883, emailing thickfilm@anaren.com, or via download at www.anaren.com
