## Anaren Introduces New 1.0-1.5GHz Ultra-Low Profile 3dB, 90 Degrees Hybrid Coupler

**Measuring Only 0.08 x 0.05 Inches (2 x 1.29 mm), New Ultra-Low-Profile 3dB, 90° Hybrid Coupler Offers Superior Insertion Loss Performance and is Well-Suited for Point-to-Point and GPS Applications**

SYRACUSE, N.Y., Feb. 19, 2013 (GLOBE NEWSWIRE) -- Anaren, Inc. (Nasdaq:ANEN) announced it has introduced a new low-cost, low-profile subminiature 3dB, 90° hybrid coupler (part no. C1015J5003AHF) offering excellent performance characteristics in an easy-to-use surface mount package.

Part of Anaren's growing line-up of Xinger®-brand subminiature components, the C1015J5003AHF is ideal for balanced power and low noise amplifiers, plus signal distribution and other applications where low insertion loss and tight amplitude and phase balance are required.

Like most of the company's Xinger-brand components, this new part:

- is constructed from ceramic filled PTFE composites, which possess excellent electrical and mechanical stability;
- has been subjected to rigorous qualification testing and is 100% RF tested;
- is RoHS compliant, to help address base station equipment manufacturer's environmental requirements;
- is shipped on tape and reel packaging, for use in high-volume pick and place systems
- and is supported by the company's new "Submini Central" online resource, offering white papers, applications notes, informational videos, and other support tools

Key specifications for the component are as follows:

Part no.	Dimension inches (mm)	Freq. (GHz)	Port Impedance(Ω)	Isolation (min, dB)	Return loss (min, dB)	Insertion loss (max, dB)
C1015J5003AHF	0.079 x 0.049 x 0.027in (2.04 x 1.29 x 0.7)	1.0 — 1.5	50/50	20	15	0.60
