

# Index

## Symbols

- ! (NOT) logical operator, 208, 452
- != (not equal to) relational operator, 186
- # (pound sign), 114
- #define directive, 94, 120-128
- #include directive, 61, 107, 115-120
- % (modulus) math operator, 164, 167-168
- %= (compound operator), 177
- & (address of) pointer operator, 542
- & (ampersand), 155, 391
- && (AND) logical operator, 208
- ( ) (parentheses), 46, 336, 365
- " " (double quotation marks), 85, 117
- ' ' (quotation marks), 89
- , comma operator, 232-234, 758
- \* (asterisks), 345
- \* (dereferencing) pointer operator, 542
- \* (multiplication) math operator, 64, 164
- \*= (compound operator), 177
- + (addition) math operator, 64, 164
- ++ (increment) operator, 225
- += (compound operator), 177
- (hyphen), 336
- (subtraction) math operator, 64, 164
- (decrement) operator, 225
- = (compound operator), 177
- . (dot) operator, 592, 608, 616
- / (division) math operator, 64, 164, 167-168
- // (slashes), 46
- /= (compound operator), 177
- : (colon), 321
- ; (semicolon), 56, 114, 120, 190, 339

- < (input redirection symbol), 435
- < (less than) relational operators, 186
- < > (angled brackets), 117
- <= (less than or equal to) relational operator, 186
- = (assignment operator), 63, 174-178
- = (equal sign), 80, 105, 400
- == (equal to) relational operator, 186
- > (greater than) relational operator, 186
- > (output redirection symbol), 435
- >= (greater than or equal to) relational operator, 186
- [ ] (brackets), 46, 100, 523
- \ (backslash), 91
- \n (newline character), 91, 135-136, 433, 635
- \t (tab character), 138, 433
- \_ (underscore), 336
- { } (braces), 46, 56, 340
  - functions, 336
  - initializing arrays, 527
- || (OR) logical operator, 208
- ~Sphere( ) function, 663-670
- 2's complement, 692, 760

## A

- absolute values, 420-421, 461
- access modes
  - random file, 648
  - read, 639
- accessing
  - disks, 625
  - elements (arrays), 101
  - files, 627-628
    - modes, 630
    - random access, 627

- sequential file access, 625-627
  - text mode, 630
  - members, classes, 675
  - RAM, 627
- adapters, display, 24, 751
- addition (+) math operator, 64, 164
- address of (&) pointer operator, 542
- addresses, 32, 559
  - & (address of) pointer operator, 542
  - arrays, passing, 386
  - integers, assigning floating-point variables, 549
  - memory, 385, 681-682, 747
  - passing
    - nonarrays, 391-396
    - variables, 374, 385-394, 756
  - pointers, 542
- addressing, 679
- Algol programming language, 15
- allocating memory, dynamic
  - allocation, 665
- alphabetic testing functions, 450-451
- Alt keys, 25
- American National Standards Institute (ANSI), 13, 747
- American Standard Code for Information Interchange, *see* ASCII
- ampersand (&), 155, 391
- analog signals, 29
- AND (&&) logical operator, 208
- angled brackets (< >), 117
- ANSI (American National Standards Institute), 747
- appending
  - cout operator, 93
  - files, 628, 638-639
- application-specific keys, 27

- arguments, 747
  - alphabetical, testing for, 451
  - default
    - lists, 415-417, 750
    - multiple, 417-420
  - member functions, 670-674
  - mismatched, 407
  - numeric, testing for, 451
  - passing, 364-366
  - receiving, 550
  - see also* variables
- arithmetic
  - binary, 690-692
  - pointers, 568-574
- arrays, 100, 474-479, 747
  - as `sizeof` argument, 231
  - assigning to arrays, 486
  - brackets (`[ ]`), printing, 102
  - character pointers, 574
  - character, *see* character arrays
  - contents, changing, 563
  - data types, mixing, 609
  - declaring, 100, 475
    - strings, 478
    - subscripts, 482
  - defining, data type, 475
  - elements, 101, 751
    - accessing, 101
    - initializing all to zero, 481
    - inputting to, 611
    - subscripts, 101-102
  - filling
    - random values, 497
    - user input, 389
  - global, *see* global arrays
  - individual characters, 105
  - initializing, 104-105, 479-490
    - assignment operator, 480
    - braces (`{ }`), 527
    - brackets `[ ]`, 480
    - multidimensional, 529
  - mapping to memory, 524-526
  - members, 615-622
  - multidimensional, *see* multidimensional arrays
  - names
    - as pointers, 558-559
    - changing, 560
  - notation, 608-610
  - parallel, 756
  - passing, 388
    - by address, 386
    - functions, 387
    - to functions, 484
  - (of) pointers, 551-553
  - pointers, 493
  - printing with `cout` operator, 102
  - ragged-edge, 574
  - referencing, 508-515, 558
  - reserving memory, 476
  - searching, 494-495
    - for statement, 496
    - for values, 496-501
    - `if` statement, 496
  - sizes, 128, 476-477, 480
  - sorting, 494-495, 501-508, 758
    - ascending sort, 506
    - bubble sort, 502-505, 748
    - character arrays, 508
    - descending sort, 494, 506
    - nested loops, 504
    - numeric arrays, 508
    - quicksort, 502, 757
    - shell sort, 502, 758
  - (of) strings, 574-578
  - strings
    - printing, 563
    - storing, 574
  - (of) structures, 589, 747
  - structures, declaring, 606-615
  - subscripts, 474
  - two-dimensional, 525
  - type, specifying, 390
  - values, assigning, 103
  - see also* nonarrays

- arrow keys, 27
  - ascending sort, 506
  - ASCII (American Std. Code for Information Interchange), 747
    - characters, 683
    - returning, 409
    - files, 747
    - text files, 115, 630
    - values, printing, 154
  - ASCII Table, 719, 722-727
  - `asci i ( )` function, 409
  - assigning
    - arrays to arrays, 486
    - floating-point variables, 549
    - literals
      - character, 89-93
      - integer, 83-84
      - string, 85
    - string values to character arrays, 105
    - values
      - arrays, 103
      - elements, 479
      - members, 602
      - out-of-range subscripts, 479
      - strings, 107
      - to pointers, 545-546
      - to variables, 145
      - variables, 80-82
  - assignment operator (`=`), 63, 174-178, 480
  - assignment statements, 80, 105
    - pointers, initializing, 548
    - start expressions, 274
  - assignments
    - associating, 175-176
    - compound, 176-178
    - multiple, 175-176
    - statements, 174-178
  - associating assignments, 175-176
  - asterisks (`*`), 345
  - AT & T, 12
  - `atof ( )` function, 460
  - `atoi ( )` function, 460
  - `atol ( )` function, 460
  - `auto` keyword, 369
  - AUTOEXEC.BAT file, 747
  - automatic variables, 369-374, 747
- ## B
- backslash (`\`), 91
  - backup files, 748
  - base-2 numbers, 686
  - base-10 numbers, 689
  - base-16 numbers, 695
  - BCPL programming language, 15
  - BEEP, 314
  - binary
    - arithmetic, 690-692
    - digits, 683, 748
    - file format, 631
    - modes, 631
    - operations, 165
    - states of electricity, 21
    - zeros, 88, 748
  - binary numbers, 17, 165, 679, 686-690, 748
    - converting
      - from hexadecimal numbers, 697
      - to 2's complement, 692
      - to hexadecimal, 697
    - negative, 692-694
  - binary state of electricity, 683
  - bit mask, 240, 748
  - bits, 682-685, 748
    - high-order, 686
    - least-significant, 686, 753
    - low-order, 686
    - most-significant, 686
    - order, 686
    - sign, 693
  - bitwise operators, 235-244, 748
    - truth tables, 235-236

- blank
  - characters, 680
  - expressions, *see* null expression
  - lines, 136
- blocks, 55
  - braces ( { } ), 56
  - case, break statements, 312
  - statements, 246, 748

  - M (megabytes), 24, 754
  - reserving, arrays, 476

## C

- C++
  - comparing to other languages, 16
  - origination, 15-16
- calculations
  - data types, mixing, 178-182
  - strings, 460
  - structure members, 597
- called functions, 364
  - recognizing, 368-369
  - return values, 398
  - variables, changing, 387
- calling functions, 337-349
  - repeatedly, 417
- carriage returns, 439
- case blocks, break statements, 312
- case expressions, 312
- case statements, 313, 319
- cathode ray tube (CRT), 24, 748
- ceil (x) function, 461
- ceiling function, 461
- central processing unit (CPU), 20-22, 748
- cfront (UNIX) compiler, 43
- CGA display adapter, 24
- character arrays, 100-103
  - control\_string, 149
  - erasing, passing to functions, 390
  - filenames, storing, 633
  - initializing, 480
  - pointing, to new strings, 563
  - reserving, 100, 480
  - sorting, 508
  - string values, assigning, 105
  - strings
    - comparing, 103-110
    - multiple, 512
    - printing, 135, 510
    - storing, 104

- character formatting constants,
  - defining, 440
- character functions, 450-455
  - conversion, 453-455
    - to lower(c), 454
    - to upper(c), 454
  - isalnum(c), 451
  - isalpha(c), 450
  - isdigit(c), 451
  - islower(c), 450
  - isupper(c), 450
  - isxdigit(c), 451
  - passing to, 451
  - testing, 450-453
    - for digits, 451
    - isctrl(c), 453
    - isgraph(c), 453
    - isprint(c), 453
    - ispunct(c), 453
    - isspace(c), 453
- character I/O functions, 432-446
- character literals, 64, 89-93
- character pointers, 563-568
  - arrays
    - defining, 574
    - storing, 574
  - filenames, 633
  - string constants, changing, 566
- character strings, variables, 100
- character variables, 75
- character-based literals, 62
- characters
  - \t (tab), 138
  - ASCII, 683, 409
  - comparing, 199
  - conversion, 151-154
  - individual, arrays, 105
  - newline (\n), 135-136
  - string-terminating, 101, 457-458
- cin, 144-148, 248-249
  - input, keyboard, 144
  - values, variables, 145
- classes, 661-670, 749
  - functions, defining, 754
  - member functions, 662-676
  - members
    - accessing, 675
    - data, 662
    - private, 674, 757
    - public, 757
    - visibility, 674-675
  - objects, 663
  - public, 662, 674
- close( ) function, 629
- closing files, 629-634
- code, 749
  - modules, *see* functions
  - object, 755
  - source, *see* source code
  - spaghetti, 759
  - unreachable, 305
- colon (:), 321
- columns, printing, 139-140, 534
- combining functions, cout and
  - ofstream, 437
- combining redirection symbols, 436
- comma (,) operator, 232-234, 758
- comments, 46, 57-61, 749
- comparing
  - characters, 199
  - data, relational operators, 186
  - internal data, bit-by-bit, 235
  - literals to variables, 192
  - loops, if vs. while, 255
  - numbers, 199
  - variables, 192
- compatibility,
  - AT & T, 12
  - with other computers, 433
