

Falcon4

General Description

FALCON4 is our smallest audio and video digital recorder. Its miniaturised enclosure makes it the ideal option for installations and concealments where video capture is required. The FALCON4 shares the same video settings and recording times with the HAWK8A. It can record audio in stereo and colour video from 1 to 30fps. The 8GB memory capacity will provide 8 hours of audio and video at 15fps. It can also be deployed with our wireless interface for remote video and audio logging. The main difference with the HAWK8A is the battery. The HAWK8A uses 'AAA' instead of the lithium rechargeable battery of the FALCON4 which makes this device ultra-slim. The recorder is fully programmable by our unique USBIRD software and the data is transferred to a PC via a High-Speed USB port. When you purchase this recorder (or any product in the ADS family) you not only get one of the smallest most reliable solid state recorders, but you also benefit from unlimited technical support, free software upgrades and a Life-Time Warranty.

Key Features

Falcon4

Technical Specifications

Size:	1.9" x 1.5" x 0.3"
Weight (no battery):	3oz
Operating Voltage:	2.6v – 3.7v
Recording Time:	4 hours @ 30fps 8 hours @ 15fps
Battery Life:	5-8 hours
