Since 1982

N.E.W.D.

New England WarDrivers

FAQ

1. WarDriving is NOT illegal or unlawful in any form or fashion in the U.S.
2. WarDriving is NOT about theft of services
3. WarDriving is NOT about unauthorized access
4. WarDriving is NOT a crime!
5. Identifying the presence of a wireless network is NOT a criminal violation

The most popular wireless network scanner around is NetStumbler. Best of all is that it's easy to use and it's free.
For t these reasons and several others, NEWD will compile it's databases in Netstumbler format.

NEWD has two different versions of it's database available.

1. Public Version - made available to all on our webpage on the IIRG's website. (Less extensive)

2. A NEWD and IIRG member only version. (Complete Version)

We are forced to do this because their are individuals who like to benefit without participating.
If you do not participate, you will not receive the complete version., so don't bother asking.

To join the NEWD project is very easy, e-mail iirg@yahoo.com

There are very simple rules, first send us your results and we will post them to the database section
and we will NOT accept any scans without GPS data.
