### LEDR END OF SERVICE

---

#### LEDR 400, 700, 900, & 1400

---

At the end of 2013 we advised of increasing lead times for servicing some early MDS radio models due to sourcing issues of components no longer stocked by our suppliers.

LEDR 400, 700, 900, & 1400 were manufacturer discontinued January 13, 2013.

Current service trends for these systems indicate that we must take the next step to provide notice of service discontinuation. This change will take full effect as of March 01, 2018.

GE MDS does not offer a drop-in replacement for this product.

We are committed to minimize any impact and maintain total customer satisfaction. Please consult with your District Sales Manager or Product Services representative for further information.
