

CBR16-0006

High Directivity Bridge Coupler

DEVICE OVERVIEW

General Description

The CBR16-0006 offers the highest directivity of any standalone 6 GHz bridge coupler on the market. It provides an extremely high degree of measurement accuracy for forward power measurements, and can also be used to measure VSWR/return loss (see Directivity and VSWR Measurement App Note). The flat coupling ratio, high directivity, and broadband performance to 200 kHz make the CBR16-0006 an excellent 'black box' coupler for everyday lab use.

Features

- Broadband Performance
- High Directivity
- Low VSWR
- Excellent Coupling Flatness
- Compact Size and Lightweight

Applications

N/A
