

AIRCRAFT MAINTENANCE AND MODERNIZATION

MISSION INTEGRATION

Greenville, Texas

L-3 Communications Mission Integration (MID) is a world-renowned provider of aircraft maintenance and modernization services with state-of-the-art facilities in Greenville, Texas. Our capabilities include the integration of special mission systems and advanced communications, modernization of cockpit avionics, and depot-level modification, repair, and overhaul. We also offer the design, installation and certification of interiors, avionics, and self-protection systems for special mission and head-of-state aircraft.

Aviation Maintenance and Services

From operational field support to depot-level maintenance, L-3 MID provides 24/7 support throughout the world.

MID technicians service dozens of C³ISR aircraft daily with everything from depot-level maintenance, turnkey airborne training solutions and logistics support to life extension initiatives and major design changes and overhauls. Our teams are located at our Greenville, Texas modification center, as well as at customer sites in the United States and overseas to support scheduled and emerging requirements.

AeroStructure Fabrication, Assembly and Modernization

MID is a leading provider of aircraft aerostructure fabrication and assembly, offering high quality, proven performance, on budget, best value solutions to our customers. MID designs and manufactures detail parts, kits and subassemblies for aerostructure components, from turnkey sheet metal fabrication to detail parts manufacturing. We also perform final assembly of major aircraft components such as cabins, fuselages or tail booms from detail parts and subcomponents.

MID develops complex intelligence, surveillance and reconnaissance systems; command and control; and secure communications and is recognized as a systems integration organization specializing in the modernization and maintenance of aircraft of all sizes. MID is a leader in signal processing, electronic countermeasures, sensor development and aircraft self-protection.

We are a world-class systems integration organization with 60 years of experience in the aircraft maintenance and modification as part of our primary business of airborne C³ISR systems. MID has the resources and expertise in place to rapidly respond to urgent customer requirements and return aircraft to service as quickly as possible. Our Greenville, Texas facility collocates engineering, manufacturing, installation, and test to speed design, development, and integration. MID possesses world class designations such as CMMI Level 5, ISO-9001, and AS-9100. We are also certified as a FAA Class 4 Unlimited Repair Station and Organization Delegation Authorization, with an onsite FAA Organization Designation Authorization for airworthiness.
