**L-3 Communication Systems-West Announces Launch of Its FlightLens™
Next-Generation ISR Video Exploitation Software Tool**

*– FlightLens Is the Most Complete Video Processing, Exploitation and Dissemination Tool
Available on the Market Today –*

SALT LAKE CITY, August 11, 2016 – L-3 Communication Systems-West (L-3 CS-West), a leader in ISR communications, is pleased to announce FlightLens™, its video Processing, Exploitation and Dissemination (PED) software tool that supports MPEG-2, AVC/MPEG-4 and STANAG 46-compliant Full-Motion Video (FMV). The FlightLens system uses error-tolerant processing techniques to enhance video exploitation and quality and provides reliable video performance for Intelligence, Surveillance and Reconnaissance (ISR) applications.

L-3's FlightLens software supports multiple simultaneous video streams, including HD and 4K video with built-in mapping and Digital Video Recorder (DVR) functionality, allowing real-time viewing, pausing and rewinding of streaming ISR video. A built-in map ensures instant situational awareness based on GPS location and ISR vehicle metadata. Video dissemination is supported using FlightLens transcoding and a real-time streaming feature. In order to support bandwidth-constrained channels, FlightLens real-time streaming also provides bit rate reduction, resolution reduction and frame decimation.

With a modern design that leverages L-3's decades of experience, FlightLens provides a very simple, intuitive human interface. The software also gives users the ability to send, receive and save both images and video streams; capture still images with image markups and notations; and share images between FlightLens users.

For more information on FlightLens or to download a 30-day free trial, please go to www.FlightLens.net.

About L-3 Communication Systems-West

L-3 Communication Systems-West (L-3 CS-West) is a leader in communication systems for high-performance networks, including intelligence collection, imagery processing and satellite communications for the Department of Defense (DoD) and other customers. The company provides high data rate, wideband, secure, real-time communication systems for surveillance and reconnaissance. To learn more about L-3 CS-West, please visit the company's website at www.L-3com.com/csw.

About L-3

Headquartered in New York City, L-3 employs approximately 38,000 people worldwide and is a leading provider of a broad range of communication and electronic systems and products used on military and commercial platforms. L-3 is also a prime contractor in aerospace systems. The company reported 2015 sales of \$10.5 billion. To learn more about L-3, please visit the company's website at www.L-3com.com.
