HISTORY AND GOALS

Since 1961, L-3 ESSCO has been the leader and innovator in the large ground-based radome business. Today, L-3 ESSCO offers a complete line of services tailored to meet the requirements of prime contractors and government agencies worldwide. When identified in the early stages of a program, L-3 ESSCO can provide a turnkey approach and handle all phases associated with the building process by supplying foundations, towers, radomes and installation services, including antenna installation.

L-3 ESSCO firmly believes that approaching programs with a team member concept assures the successful completion of any project. Close communication and coordination with our customers throughout the entire planning, construction, manufacturing and installation phases of the plan will result in a successful program every time. At L-3 ESSCO, our goal is to provide our customers with the most cost-effective solution to maximize the potential for cost savings, deliver the product and project on time, on budget and provide a quality product that will last for years to come.

L-3 ESSCO OFFERS:

- Project management
- Civil works
- Installation / supervision
- Towers
- Design services
- In-country support

From the World Leader in Radomes

L-3 ESSCO has been installing radomes around the world for the greater part of the last half century. During this time, we have established one of the largest databases of installation locations around the world and know the specific conditions at many of these sites. We have established a broad network of subcontractors, enabling us to provide competitive bids and local content that is often vital in winning international projects.

L-3 ESSCO is the leader in the radome industry and as our customers' needs have changed over time, we respond — through technological innovation, product improvement and by expanding the breadth of services we offer. Today, as budgets grow increasingly smaller and as staffs have decreased in size, we recognize that it is important to be able to provide our clients more value for their budget dollar. L-3 ESSCO can take your project from the early conceptual stages to coordinating with local contractors, supplying towers and radomes, and work with you through the installation phase to the final sign-off of the project.

So, if it is a turnkey solution you are looking for, please contact us and let us help to bring your project to a successful conclusion.
