Turnkey Solutions ...from L-3 ESSCO

Setting the industry benchmark

For over 40 years, L-3 ESSCO has been the leader and innovator in the large ground-based radome business. Today, L-3 ESSCO offers a complete line of services tailored to meet the requirements of prime contractors and government agencies worldwide. When program elements are identified early in the project, L-3 ESSCO can provide a competitive turnkey approach by handling all phases associated with the building process—from supplying foundations, towers, radomes, project management & integration, and radome / antenna installation services to overseeing final sign-off of the completed site.

The ultimate team player

L-3 ESSCO firmly believes that approaching programs with a team member philosophy assures the successful completion of any project. Close communication and coordination

with our customers throughout the entire planning, construction, manufacturing, and installation phases of the program will provide optimal results every time. At L-3 ESSCO, our goal is to provide our customers with the most cost-effective solution to maximize the potential for cost savings, deliver the product and project on time, and provide a quality product that will last for years to come.

Unmatched install base

L-3 ESSCO has been installing radomes around the world for the greater part of the last half century. During this time, we have established one of the largest number of global installations, giving us tremendous breadth of experience and unique insight into the specific conditions at each site. We have established a broad network of subcontractors, which enables us to provide competitive bids and the valuable local content so vital in winning international projects.

Looking out for you today...and tomorrow

L-3 ESSCO knows that evolving requirements are inherent in every mission-critical environment. As our customers' needs change, we respond—through technological innovation, product improvement, or by expanding the range of services we offer. Today, as budgets grow increasingly smaller, and as staffs decrease in size, we recognize how important it is to provide our clients more value for their budget dollar. We have the dedicated staff and expertise to offer full system integration for today's needs and those of tomorrow.

If you are looking for a turnkey radome / antenna system solution, contact L-3 ESSCO today and let us move your project from conception through completion.
