

Apache MUMT(I)-International Version: Information Dominance + Lethality = Mission Success

Use of U.S. Department of Defense (DoD) visual information does not imply or constitute DoD endorsement.

The AH-64 Apache is the greatest attack helicopter. At L-3, we are committed to supporting the U.S. Army and its international Apache partners by delivering the MUMT(I) solution. MUMT(I) provides the most advanced communication system for secure, real-time high speed air to air and air to ground ISR HD video and imagery. The MUMT(I) capability increases the Apache's battlefield lethality by connecting targeting video between UAVs, Apaches, and ground forces to enhance situational awareness, targeting, and battle damage assessment.
