

L-3's Tactical ROVER™-e provides encrypted digital and analog video with aircraft and sensor positional data directly to the dismounted user for real-time situational awareness.

Key Features

- Type 1 encryption capable in a pocket-sized full-motion video receiver
- Interoperable with fielded ISR and fighter aircraft video transmitters
- Receives and displays video, aircraft position and sensor point of interest simultaneously
- Automatic waveform search
- Speed dial preset recall; quickly switch between multiple video feeds
- Powered by MBITR battery

Product Description

L-3's Tactical ROVER™-e is the first pocket-sized, encrypted, full motion video and data receiver. Designed for dismounted ground combat operations, our Tactical ROVER™-e can withstand harsh conditions while maintaining reliable communications with manned and unmanned aircraft capable of transmitting full-motion video. The Tactical ROVER™-e supports several external interfaces, allowing interoperability with display devices, wearable computers and power sources.

Tactical ROVER™-e is delivered with the L-3 SoldierSight™ software suite, allowing ground troops to view and record aircraft position and sensor point of interest on FalconView® moving map software. Tactical ROVER™-e brings unprecedented situational awareness and communications security to the farthest reaches of the battlefield.
