

Mobile Perimeter Checkpoint

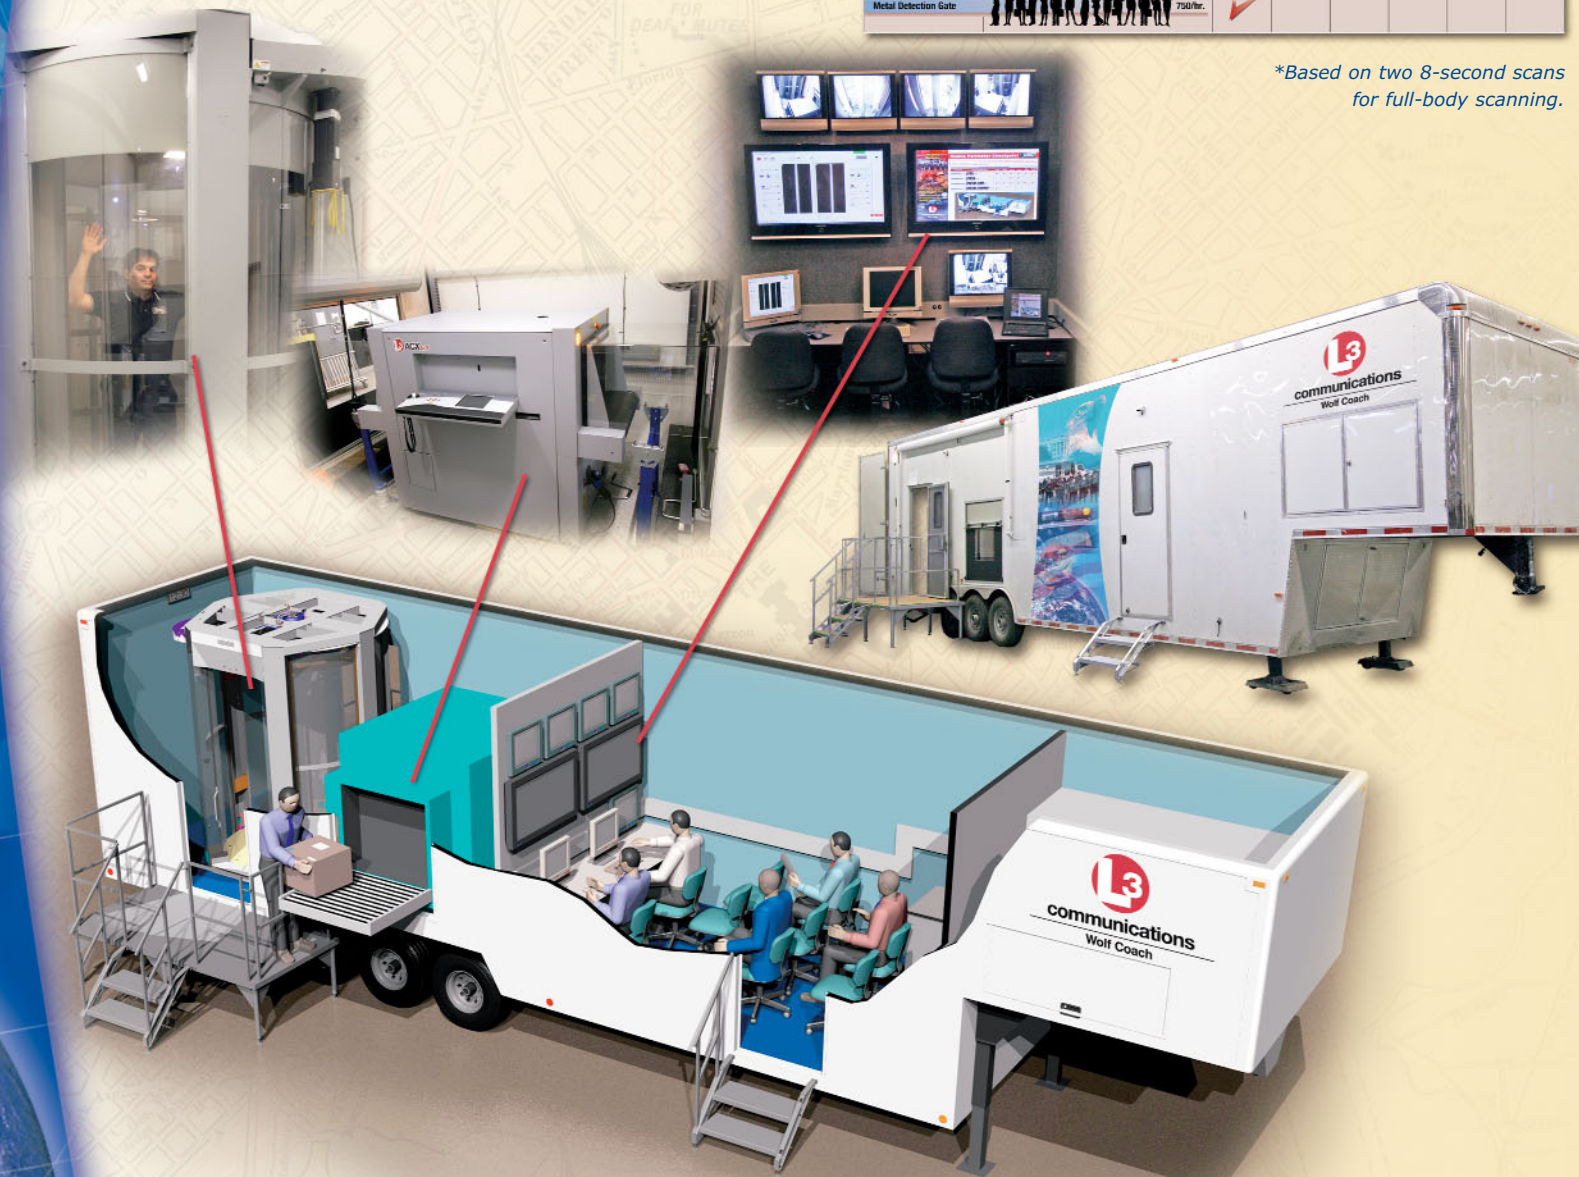

Public Safety

- > **Rapid Deploy Checkpoint**
- > **Single- and Dual-Track Configuration**
- > **Maximum Throughput**
- > **IP Connectivity for Remote Monitoring**

Detect virtually any concealed threat effectively, rapidly and safely with the ground-breaking scalable L-3 Mobile Perimeter ProVision Checkpoint Security system — all from a single source.

Threat Detection or Object Recognition						
Portal Detectors	Maximum Throughput Per Hour	Metallite Weapons	Non-Metallite Weapons	Explosives	Narcotics	Cash/ Valuables
Backscatter Portal	225/hr.*	✓	✓	✓	✓	✓
Trace Explosives Portal	276/hr.			✓	✓	
L-3 ProVision Body Scanner	600/hr.	✓	✓	✓	✓	✓
Metal Detection Gate	750/hr.	✓				

**Based on two 8-second scans for full-body scanning.*

ProVision™ Body Scanning Checkpoint Security System

Metal. Ceramic. Plastic. Wood. There's no limit to the substances that can pose or mask security risks. Now there's no limit to the threats you can see and eliminate, thanks to cutting-edge millimeter wave imaging technology from L-3. More reliable and less intrusive than pat-down searches, faster than comparative body screening systems, and safer to use than a cell phone, L-3's ProVision checkpoint security system is a bold step forward in threat detection. Because ProVision allows operators to clearly view objects made of any material — including wood, rubber, wire, plastic and metal — weapons, contraband and other threats are quickly and easily identified. Ideal for use anywhere checkpoint security is needed, the system utilizes harmless non-ionizing signals to generate a clear view in seconds.

ACX™ 6.4 Automated Checkpoint X-ray System

The ACX 6.4 Automated checkpoint system brings the power and performance once reserved for hold baggage systems to checkpoint screening without sacrificing throughput. Blending L-3's proven advanced technology (AT) explosives detection with high-clarity imaging, the ACX 6.4 offers enhanced checkpoint security capabilities that easily integrate into your current security operations and footprint. The ACX 6.4 scans briefcases, laptops, backpacks, packages, mail and other small- to medium-sized objects with simultaneous X-ray imaging and advanced explosives detection technology. It automatically pinpoints explosives and other potential threats, allowing operators to respond quickly and appropriately. The versatile ACX 6.4 strengthens security, while maintaining high throughput, to help you meet today's ever evolving screening challenges.
