OMNixi™ Secure Terminal	Type 1 security for voice and data applications. Fully compatible with SCIP / FNBDT equipment. Features include PSTN network interface, local phone interface, TIA/EIA-232E/530/530A serial port, TIA/EIA-232E/530/530A digital network interface, 2,400 bps & 6,400 bps secure voice modes, 2,400 bps thru 115.2 kbps Async secure data modes, 15 Mbps sync secure data modes, remote control via AT commands, software upgradeable, 2-year warranty, User's Manual, PP&P and transportation. (Includes two DB-25 Data Cable Adapters: 1 for Local Serial Interface and 1 for Network Serial Interface) OMNixi™ Secure Terminal with Multi Universal Key Material Supports: National, NATO, Coalition and CCEB	
	Quantity	
	1-999	\$1,400
	1,000 or more	\$1,350
1-Yr Warranty Ext.	Adds one (1) year to original two (2) year warranty (All Models).	\$100
3-Yr Warranty Ext.	Adds three (3) years to original two (2) year warranty (All Models).	\$330
OMNixi™ SW Upgrade Kit	This software upgrade to the OMNI SCIP/FNBDT terminal is available at no charge to existing users of the OMNI terminal. To obtain access to the OMNixi mode of operation please visit WWW.L-3Com.com/OMNixiupgrade for further upgrade information, access codes, and set-up instructions. This upgrade is available to all OMNI units (US National, Canadian National, UK National, Australian National, New Zealand National, CCEB Users, NATO Member Nations, and Coalition User Communities). This OMNixi upgrade kit introduces secure digital voice and secure high-speed serial data (115.2 kbps Async and 15 Mbps Sync) over digital networks via the TIA/EIA-232E/530/530A digital network interface.	\$0
OMNI™ Upgrade Retrofit	This modification of pre-Release 3.0 units, allows for the future enhancement of the OMNI™ and OMNixi™ to support crypto modernization and increase the maximum data rate (OMNixi™ link encryption mode) to 15Mbps. The user will ship the OMNI™ unit (prepaid) to L-3 CS-E. L-3 CS-E will upgrade and return the unit to the user.	\$655
Combined OMNI™ Upgrade Retrofit and OMNixi™ Upgrade Kit	This CLIN includes the OMNI™/OMNixi Hardware Upgrade Retrofit, the SCIP/FNBDT secure terminal OMNixi Software Upgrade, and the OMNixi DNI cable. The OMNI™/OMNixi Upgrade Retrofit of pre-release 3.0 units allows the future enhancement of the OMNI and OMNixi to support crypto modernization and increase the maximum data rate (OMNixi link encryption mode) to 15 Mbps. The SCIP/FNBDT Secure Terminal OMNixi DNI cable allows for digital network interface when used in the OMNixi link encryption mode. The user will ship the OMNI unit (prepaid) to L-3 CS-E. L-3 CS-E will upgrade the hardware, upgrade the OMNI to an OMNixi, and return the unit (with the OMNixi DNI cable) to the user.	\$720
OMNI™ Out of Warranty Repair	The user will ship the OMNI™ unit (prepaid) to L-3 CS-E. L-3 CS-E will repair and return the unit to the user.	\$595
DTD Adapter Cable K10048886-2	This cable connects the OMNI or OMNixi terminals to an AN/CYZ-10 DATA Transfer Device (DTD) for the loading of key material.	\$190
OMNI xi Power Supply Kit K10052194-502	91-252 VAC, 47-63 HZ (Auto Ranging) power supply to power the OMNixi terminal. This is a direct replacement for the power supply that is included in the original kit of parts for both OMNI™/OMNixi™. Shielded AC power cord included.	\$75
Digital Network Cable Kit for OMNI Hardware Version 3.0	For units with part numbers K10049663 or K10050598. Shielded power cord replaces original power cord. Digital Network cable, one end terminates in a DB25 connector, the other connects on the OMNixi Digital Network interface port (side of OMNixi).	\$65
Digital Network Cable Kit for OMNI Hardware Version 2.5	For units with part number K10048240. Shielded power cord replaces original power cord. Digital Network cable, one end terminates in a DB25 connector, the other connects on the OMNixi Digital Network interface port (side of OMNixi). Local Data cable, one end terminates in a DB25 connector, the other connects to the OMNI/OMNixi local data port (back of the unit).	\$110

Item	Description	Price
PC/Laptop Local Data Cable K10048260-3	Local Data cable, one end terminates in a DB9 connector (PC or Laptop), the other connects to the OMNI/OMNixi local data port. (back of the OMNI/OMNixi)	\$75
Local Data Cable K10048260-4	Local Data cable, one end terminates in a DB25 connector, the other connects to the OMNI/OMNixi local data port (back of the OMNI/OMNixi).	\$75
