

Red Eagle™ Training Services

PRODUCT DESCRIPTION

The RedEagle™ Training Courses are intended to impart the knowledge needed to install the RedEagle™ network encryptors, create and maintain multiple Virtual Private Networks (VPNs) and manage the RedEagle™ devices as part of a secure network solution.

Installation and Configuration Training: This 2-day hands-on course provides students with the necessary background to support all aspects of installing and configuring RedEagle™ KG-240 and KG-245 HAIPIS Compliant network encryptors. This course is held at L-3's facility in Camden, N.J.

Management and Administration Training: This 3-day hands on course allows students to learn the details of managing RedEagle™ network encryptors using RedEagle™ Remote Management application. This course is held at L-3's facility in Camden N.J.

TRAINING CLASS OVERVIEW

Group paced instruction is used to ensure all students acquire a working knowledge of integrating and managing RedEagle™ technology. The hands-on portion of the course is conducted using dedicated RedEagle™ equipment and network devices in the performance of laboratory exercises, all of which leaves students with complete understanding of the course objectives.
