HOW TO USE THE JACKPOT DEVICE

BUILD THE CIRCUITS.. CHOOSE WHICH DESIGN YOU WANT TO TRY. DESIGN1 USES THE TRADITIONAL DIRECT CONTACT METHOD TO SIMULATE LIGHTNING OR ELECTRONIC ARCS. OUR SG1, SG2 METHOD CREATES A SILENT BUT POWERFUL ARC THAT CANNOT BE HEARD. THIS ENABLES US TO INITIATE A SUPER ARC NEVER BEFORE USED IN THE WIDE OPEN. IT SIMPLY CANNOT BE HEARD. IT WORKS GREAT.

DESIGN2 USES A NEWER EMP TECHNOLOGY BUT CANNOT PENETRATE THROUGH STEEL AS WELL AS THE ARC METHOD.

BOTH WORK WELL. FIND THE RIGHT FREQUENCY BY ADJUSTING THE POTENTIOMETER.

DO NOT RUN THE DEVICE FOR TOO LONG UNLESS YOU HAVE THE MOSFET HEATSINKED.

USE A STANDARD 9V BATTERY.

USE THICKER WIRE TO ASSEMBLE THE CAPACITORS AND SG1, SG2 CIRCUIT TOGETHER.

WWW.PLANS-KITS.COM

WE SELL A KIT FOR THIS DEVICE AND ALL MAJOR PARTS.

ENJOY.
