

## CHAMP400X Polishing Machine

### FEATURES & APPLICATIONS

- Cycloid trace coverage
- Adjustable polishing pressure
- Innovative arrangement of linear slides design
- Performance quality exceeds figure 8
- Settable direction and timer
- Compact design allows robust polishing without disassembling the specimen
- Simple and accurate adjustable panel
- Ideal for manufacturing production and R&D applications
- Efficient and convenient for in-process inspections
- Application for secondary operation, coating, and ultrasonic cleaning
- Enable utilization for versatile fixture and tooling designs
- Provide wide variety of standard and special polishing needs
- Ideal application for automated and manual control production environments
