Machine vision: new catalogue for LED lighting

LATAB, the Swedish manufacturer of LED lighting for machine vision, presents its new product catalogue.

The new catalogue is the ideal tool to find the optimum lighting for machine vision applications quickly and simply.

In addition to an extensive range of LED lights, controllers and accessories, the catalogue also has a few new products. These include a 50° ring light to illuminate cylindrical objects, high-brightness spot lights, rectangular lights and ring lights alongside innovative controllers. The new catalogue is available free of charge as a pdf download and as a printed version.
