## **Polytec WEB ACADEMY – Online Seminars on Optical Metrology 2011**

Benefit from the know-how of the experts. With Polytec GmbH, users interested in metrology and anyone wanting to become one can familiarize themselves with the potential applications of optical metrology directly at their workstation in online seminars.

The Polytec Web Academy is an e-learning medium conveying sound knowledge about applications and solutions in optical metrology conveniently, without obligation and free of charge. The topics include proven and effective measurement procedures for variables such as vibration, movement and surface topography. They cover a multitude of application areas such as automotive, aerospace, ultrasound technology, MEMS and MST as well as biology, medicine and many more.

Polytec is offering these online seminars to convey technical know-how, application knowledge and product news directly, interactively and with the aid of multimedia. In addition, there is of course every opportunity to discuss application issues directly with Polytec's experts in the chatroom.

The event schedule is available online on the web - these informative technology and application seminars can be booked and visited right now.

Register for your preferred seminar at the Polytec Web Academy at: [http://polytec-de.webex.com](http://polytec.de.webex.com) for German-language offerings, or at: <http://polytec.webex.com>.

There you'll also find the current list of topics and dates.
