## **Polytec South-East Asia Coming Soon**

With Headquarters in Waldbronn, Germany, Polytec has been providing Laser Doppler Vibrometer's (LDV) worldwide for non-contact vibration measurements to the data storage industry for 20 years. All leading HDD manufacturers and component suppliers use Polytec LDV technology for R&D, as well as for product manufacturing process quality control, either on drives or component levels. At Polytec we are proud of being the gold standard for vibration testing in the HDD industry.

In order to serve our customers in South-East Asia even better, Polytec will start its wholly owned Polytec South-East Asia operation from January 1st, 2013 onwards.

Polytec South-East Asia Pte. Ltd. will exclusively serve all HDD manufactures and suppliers in this region. This includes not only sales and application support but also a fully equipped service lab for repair and calibration of LDV equipment.

Polytec SEA is conveniently located in one of Singapore's industrial parks Techplace I at Block 4010 Ang Mo Kio Ave 10 #06-06. The total floor space of 260 m<sup>2</sup> leaves space enough for future expansion and includes meeting and demonstration areas for seminars and presentations of equipment.

In addition there will be local support personnel for our customers in Thailand.

The foundation of Polytec SEA will certainly improve the service to our HDD customers. The new team of Polytec SEA is looking forward to working with you.
