## RoboVib® Big in Japan

Polytec now offers automated vibration measurements in Japan

On September 8<sup>th</sup>, 2015 Polytec Japan proudly presented its new automated RoboVib® Test Center in Yokohama City to an expert audience of customers and partners.

With the automated structural test station inhouse, the Japanese subsidiary expands its possibilities in vibrometry expert services for research as well as customers from automotive, aerospace and consumer goods industry.

The opening speeches of Michitaka Fujita GM of Polytec Japan and Polytec CEO Dr. Dietmar Gnass emphasized the importance of the Japanese market and the Polytec technologies that can contribute to R&D activities in Japan. After Waldbronn, Germany and Dexter, USA this is already the third Polytec automated test center for modal analysis and model evaluation.
