

Polytec *Mission Statement*

- Polytec is an innovative, high-technology company specializing in optical measurement of vibration, velocity and length, and topography.
- In order to benefit our customers, employees and partners, we seek profitable growth which allows us to re-invest in our company, technology and products.
- We seek to be the market leader and technology leader in our field.
- We are, and will remain, the global market leader in vibration measurement using Laser Doppler Vibrometry. The major industrial regions of the world will be served by direct Polytec offices.
- We generate value for our customers through providing new and innovative products and services, which in turn improve our customers' competitive advantages.
- Polytec holds an innovative and entrepreneurial culture, open to new technologies, applications and markets.
- Polytec stands for quality in our products, processes and services.
- Highly capable employees from diverse cultures characterize the global Polytec team.
- In all that we do, we seek to satisfy our customers, including anticipating the long-term requirements of current and future customers.
- Satisfied and committed employees are the key to achievement of our goals. We treat each other with respect and mutual esteem.
