N/A

9. Old CLEI Code

N/A

10. Drawing

N/A

11. Associated Products or Changes Affected

N/A

12. Classification Substantiation

N/A

13. Reason for Change

Minor update to address an internal hardware change. See 14. Description of Changes for full details.

NOTE: Back revving to v1.11 (aka installing v1.11 onto a SyncServer that has previously been updated to a more current revision of software) is advised only if it is deemed necessary. Back revving to either v1.01 or v1.10 is not advised and may load software into the SyncServer that will not operate.

14. Description of Changes

- An internal processor change was required in the design of the SyncServer S2xx models. This change in no way effected the operation of the server, it does not address any defects that may have existed, nor does it add any new features.
- The v1.11 software identifies the internal processor installed in the SyncServer S200/S250/S250i and configures itself appropriately for normal operation.

15. Effect of Change

The v1.11 software identifies the internal processor installed in the SyncServer S200/S250/S250i and configures itself appropriately for normal operation.

16. Material Affected

N/A

17. Documentation Affected

N/A
